

COMPANION APP

Download page for installation files

<https://its-gmbh.de/wp-content/companion-app/ITS-Companion-v3-Install.zip>

To run this software you need one license for each PC!
Otherwise you can only use a demo version to test the program.

Basic license of the COMPANION APP

Report generator for the recorded test data (offline)

Pro-license of the COMPANION APP:

Report generator for the saved data (offline + **online**)

Program editor to create test programmes (templates)

Remote control of the machine from a computer

Pro-Plus-license of the COMPANION APP:

Report generator, Program editor, Remote control (PRO)

Layout editor for customizing the reports

To obtain a license please contact ITS GmbH via support@its-gmbh.de

1. Requirements for use.

Computer (x86) with standard Windows 10/11 (at least Windows 7).

Microsoft .NET Framework 4.7.2. has to be installed or will be installed. An internet connection will be necessary for this.

The iTS GmbH machine needs optional equipment and license for data saving.

The data saving must be activated **prior to any test** for the machine display (HMI Touch Panel) to save the data in a file in the internal flash disk memory. Tests performed without activation can no longer be evaluated.

Optional

A USB flash drive to transfer data from the panel to a computer

Or

2nd Network connection of the machine with separate network interface card in the machine's touch panel. (Only available with the PRO version)

To connect water spray test chambers of model SPK ... (or SRA ..) it needs to have a 5.x+ software. Older chambers might not have all necessary information.

To connect dust test chambers of model SK ... it needs a firmware V6.1 or newer. Older SK firmware (<2020) is incompatible to Companion app.

Chambers build prior to 2020 should be tested with sample data but can usually be upgraded (>contact iTS service).

Contact iTS GmbH to find out whether your chamber meets the criteria.
